Create customized templates for your patient exams.

When you click each button on relevant tabs it takes you through a series of questions based on your exam template [i.e. Chemical History: all responses can be set to default to No, if one is Yes, you can click the button, set to the answer to "Yes" which will trigger your response questions; Age of first use, Last use if current etc.]

Tab colors change to blue as each section is completed. Then chart/exam can be approved and locked.

## DASHBOARD

Using the Dashboard view you can get an overall picture of the patient's Medical Conditions, Medications, Allergies etc.
